AKSHIT SINGH

AI Automation Engineer

India | +91 7291090855 | akshit.s22@outlook.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

AI Automation Engineer building tools for customer requests, follow-ups and service operations. Portfolio includes 5 Python automation projects with 22 automated tests and a Node.js legal-intake assistant. Experience with n8n, REST APIs, PostgreSQL, cloud deployment and human-review workflows, supported by a legal background in research and documentation.

TECHNICAL SKILLS

Backend: Python, Flask, REST APIs, JSON, SQL, PostgreSQL, Gunicorn

AI and Automation: n8n, Webhooks, OpenAI API, Anthropic API, Prompt Design, LLM Output Validation, Gmail Integration, Human-In-The-Loop Workflows

Delivery: Docker, Docker Compose, Git, GitHub Actions CI, Pytest, Render

Reliability: Input Validation, API-Key Authentication, Error Handling, Duplicate-ID Checks, Audit Events, SLA Rules, Health Checks

AI AUTOMATION PROJECTS

Service Operations Control Tower *(GitHub) (Demo)*

- Developed an EV service-intake workflow using n8n, Flask, OpenAI and PostgreSQL. Routed high-risk classifications and active-warranty cases to human review.
- Implemented technician-skill matching, parts-availability checks and approval audit events. Deployed on Render with 6 Pytest tests and GitHub Actions checks for tests and Docker builds.

Customer Support Ticket System *(GitHub)*

- Integrated n8n, Flask and OpenAI to classify support tickets by category, priority, sentiment and responsible team. Stored tickets in PostgreSQL and triggered email notifications, with 4 Pytest tests covering authentication, required fields, duplicates and health.

Invoice Payment Automation *(GitHub)*

- Automated scheduled Gmail reminders for due-soon and overdue unpaid invoices through n8n, Flask and PostgreSQL. Added amount validation and duplicate-ID checks, with Docker Compose for local deployment and a 4-test suite.

Lead Follow-up System *(GitHub)*

- Connected AI-based urgency classification to n8n Gmail alerts to flag enquiries needing attention. Normalised email addresses, checked duplicate lead IDs and stored records in PostgreSQL, with 4 automated tests.

Customer Request Triage API *(GitHub)*

- Created a Flask API using OpenAI to generate 3 classification fields: summary, category and priority. Saved requests in PostgreSQL and added 4 test cases covering authentication, missing inputs and mocked AI classification.

CYPHER, Legal Intake Assistant *(Demo)*

- Built a legal-intake assistant using Node.js, Express and the Anthropic API. Designed a 4-stage interview and a 10-section matter brief to organise client facts for advocate review.

LEGAL EXPERIENCE

Independent Legal Work, Contract and Commercial Matters *(May 2026 - June 2026)*

- Prepared commercial agreements, recovery pleadings and legal notices based on client instructions.
- Organised client facts and drafted correspondence for contract and recovery matters.

Civil Chamber Associate, Chambers of Adv. Shyamji Shukla, Lucknow *(June 2025 - June 2026)*

- Drafted plaints, interim-injunction applications, counter-affidavits, rejoinders and written arguments for civil and money-recovery matters.
- Produced review petitions, appeals and procedural applications concerning pleading amendments and execution.
- Researched case law and opposing submissions for civil disputes and appeals before the U.P. Real Estate Appellate Tribunal (REAT).

EDUCATION

Enrolled Advocate, Bar Council of Uttar Pradesh *(December 2025 - Present)*

BBA LL.B. (H), Amity University, Lucknow *(June 2020 - June 2025)*
